Преимущества:

- Большое количество ГОТОВЫХ КОМПОНЕНТОВ

Недостатки:

Особенности Material Base

- Добавление новых компонентов по мере использования в проектах
- В основе классы, а не разметка
- Хорошо подходит для site-building
- SASS переменные для размеров, цветов и шрифтов
- Нет настроек в интерфейсе

OUR WORK

WHAT WE DO

Web development

We are making quality, modern websites and applications. Also, the website will be nice, fast, secure, well scalable, easy to use and maintain. And, certainly, it will be made according to all industry standards, optimized for search engines, mobile devices, and all relevant browsers.

We are making really good sites because we use **Drupal** — a professional platform for projects of any scale. We deal with both, complete development from scratch, and work with projects at various stages, from concept to support. We are constantly moving with technology, and applies the most progressive of them, such as **Material Design** by Google.

HOW WE DO THIS

We are
working
remotely

For you: a significant reduction in the cost of development, due to the lack of maintenance costs for the office.

For us: don't waste time in traffic jams, work at a convenient time and in a comfortable environment.

We use **Drupal** —
the most powerful
platform

For you: open source, high speed, reliability, security, simplicity, and convenience of using website.

For us: active international community, wide experience for effective task resolving, confidence in the reliability of the solution.

For you: reduction of time (and therefore cost) of development

For you: we guarantee an excellent result and give a guarantee for it
